Actual size

**Converts Lima and Hornby Wagons to Southern Region types**

**The 2 sheets together are sufficient for 42 wagons.  
Full range of numbers available**

**Conversion transfers for Lima Ballast Wagons**

**Correct numbering transfers to apply to Lima bogie Ballast Wagons as used on the Southern Railway.**

**They cover the entire range of numbers as used in traffic and into BR period until they were all changed over time to the BR system of numbering.**

**The only other alteration that has to be made to the wagon is to move the second vacuum cylinder from one end and place it in the centre of the chassis at the other end so there will be a single cylinder at both ends in the middle of the chassis.**

**This is just visible at both ends in the photograph beneath the white hand wheels.**

**There are 42 sets of alternative numbers to use all supplied in the 2 waterslide transfers.**
